

An Inclusive Public Toilet for London

Public Toilet

Tower of London survey

The public toilet site will be near Tower Place. I decided to choose this site near the tower place building because it's an open place of passage and for rest with some benches its all. This area is very busy, there's a lot of attractions near: the tower bridge, tower hill memorial, there's also some gardens and parks as well as restaurants, coffee shops and so on

Sun directions in each season

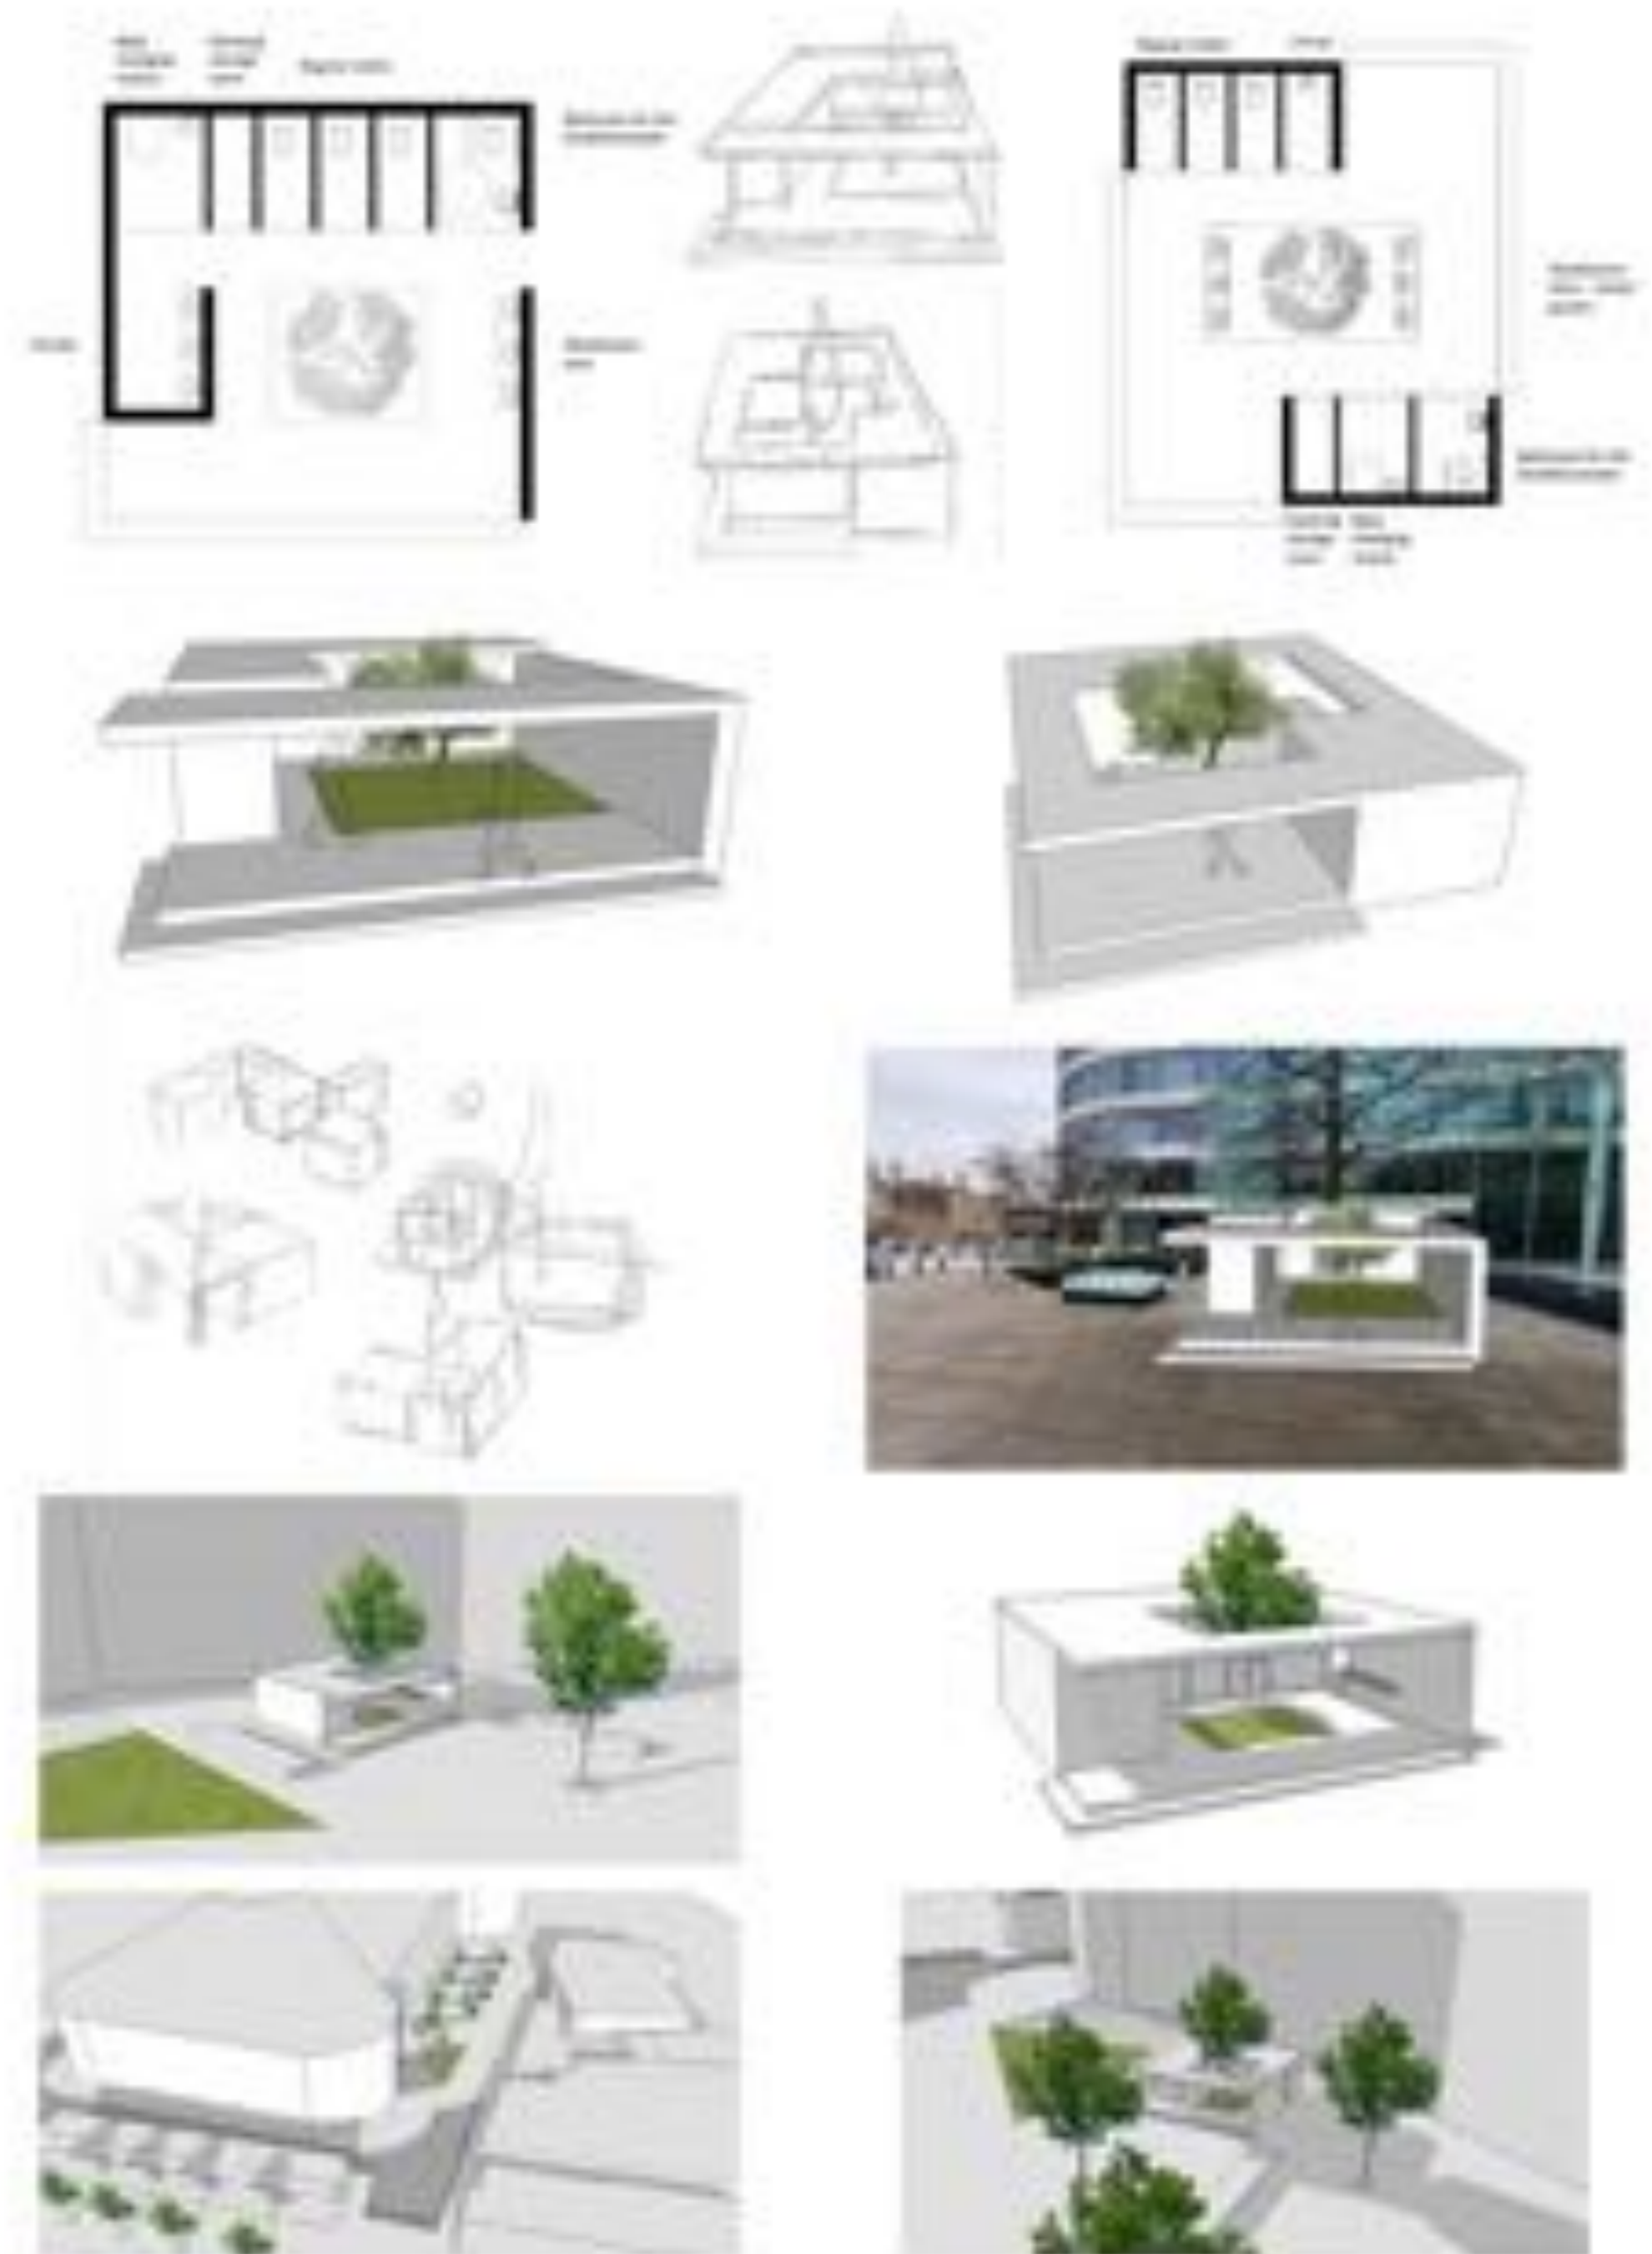

Circulation

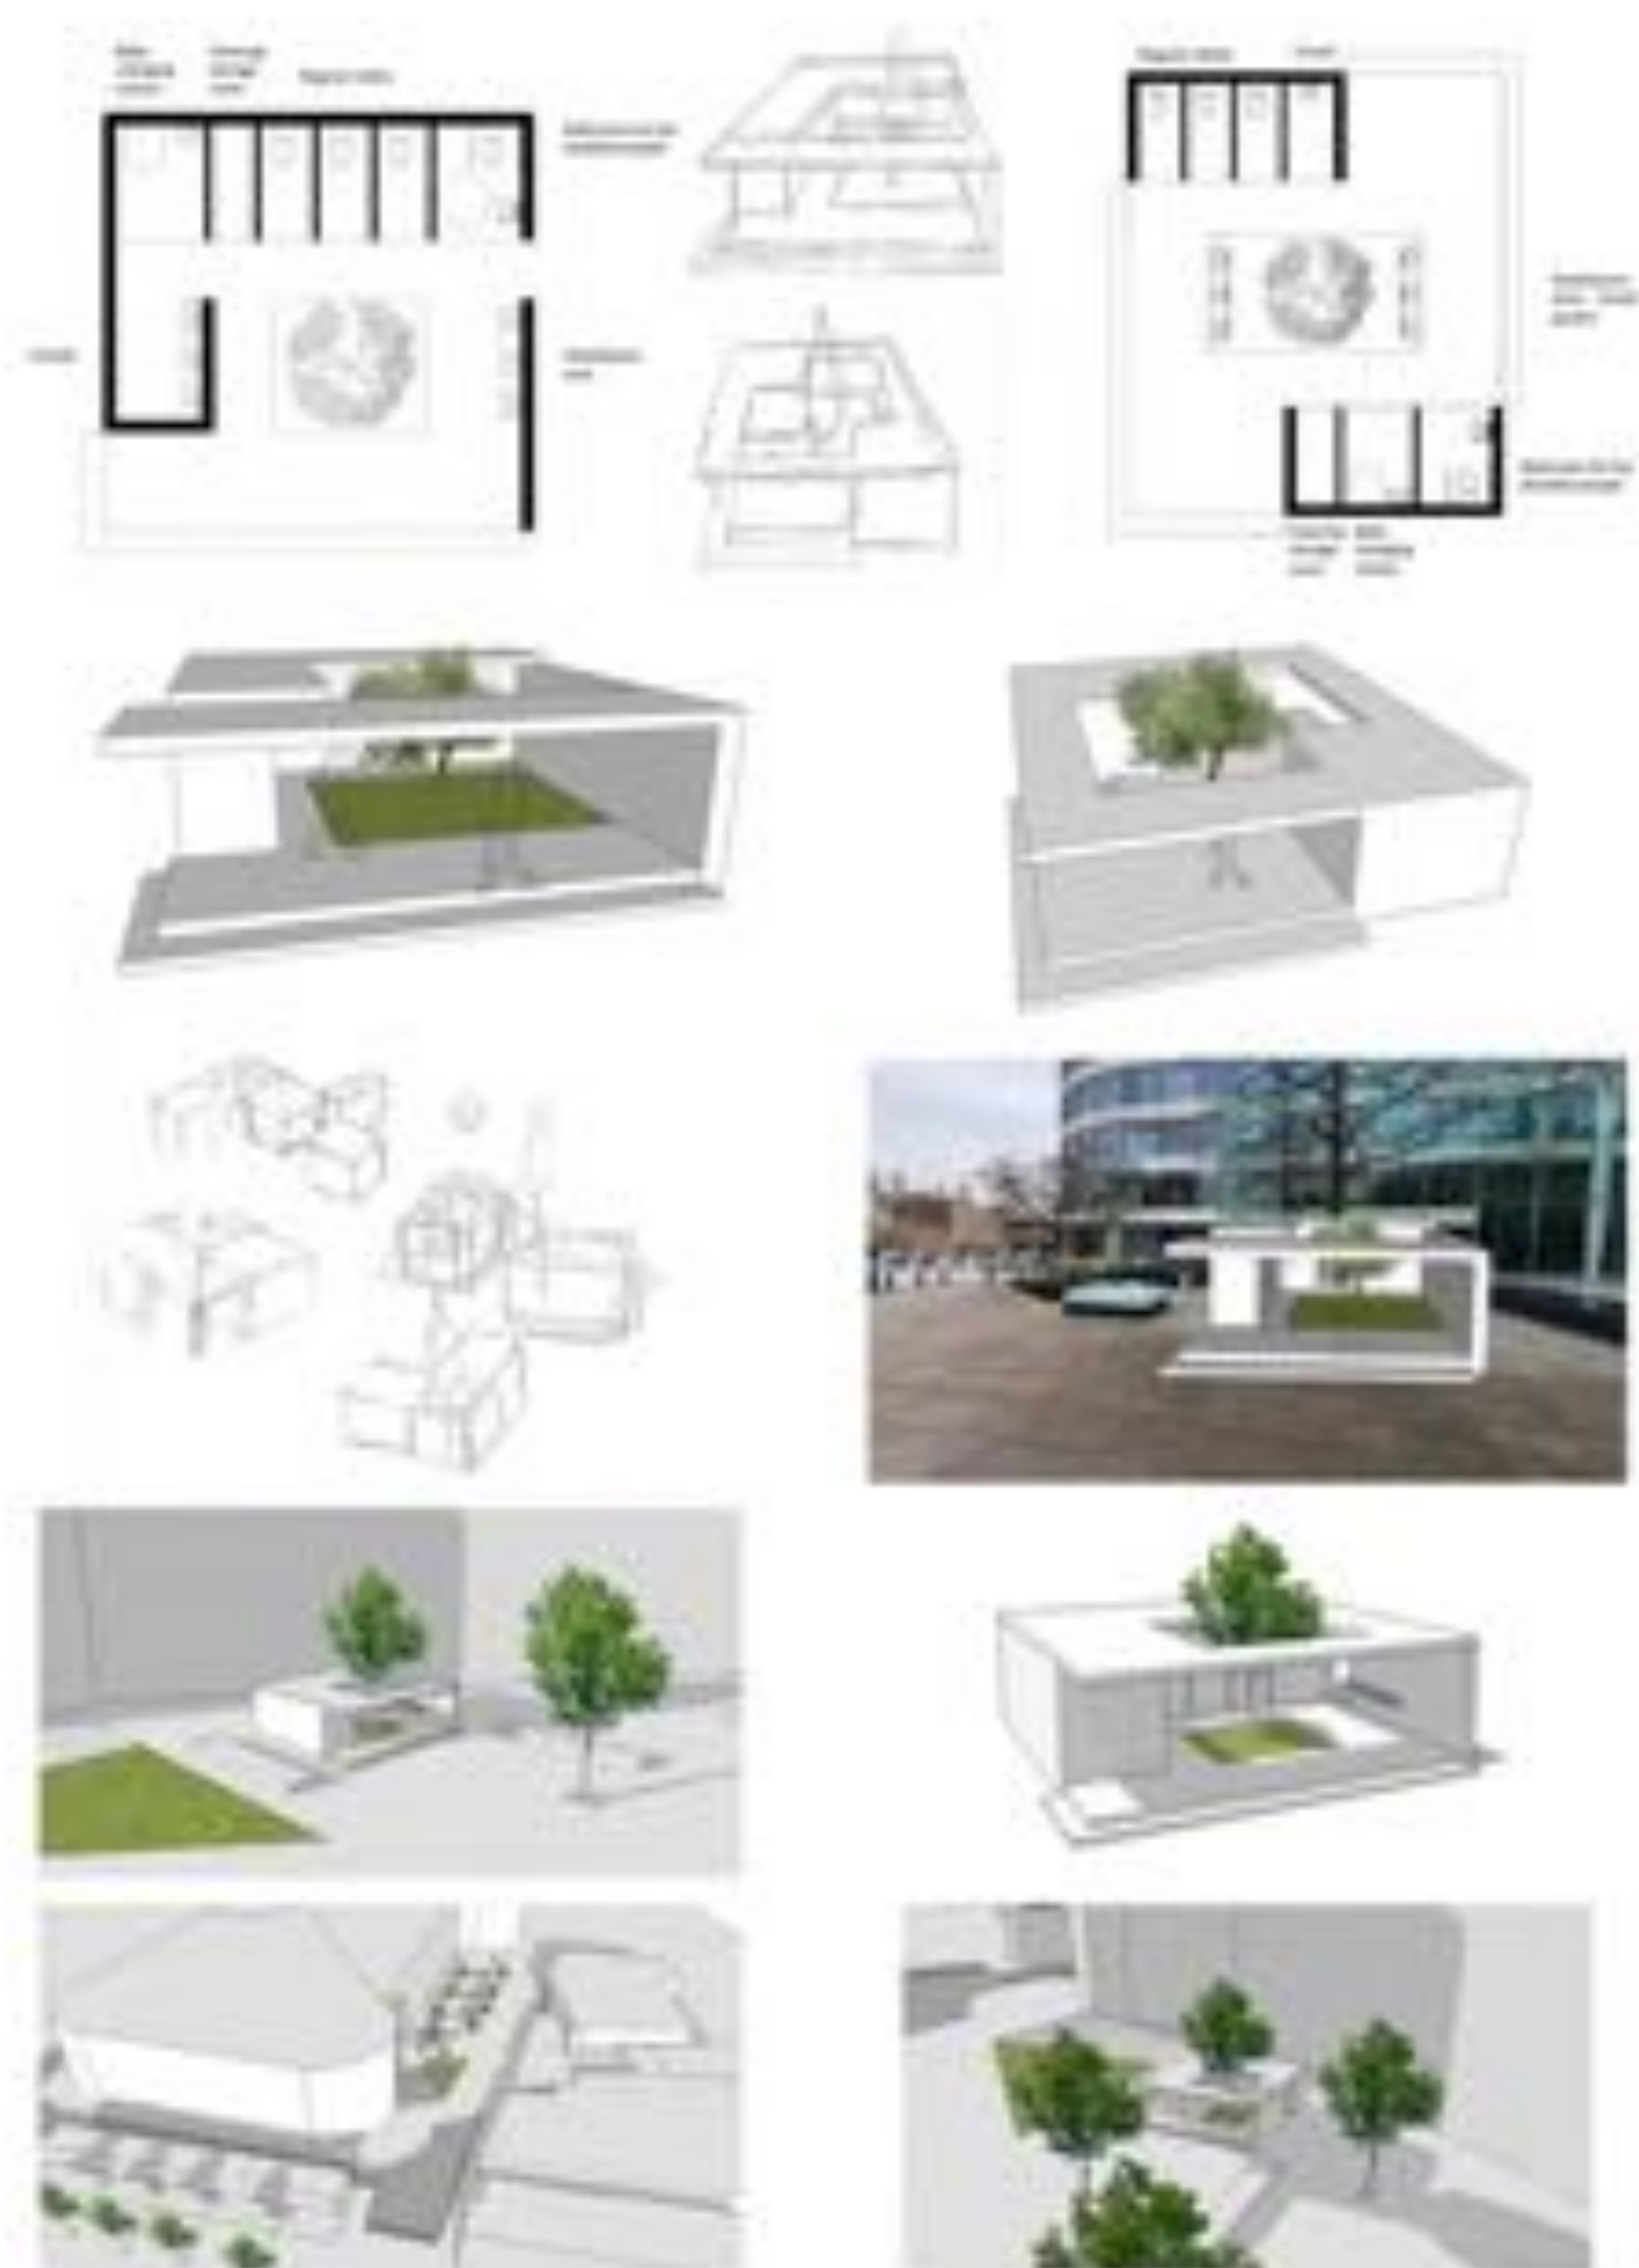

The users are in the most part tourists, families, residents, students, walkers, cyclists
