

Refresh

nothing to fear

Brief:

An educational dental space to encourage and treat those suffering from dental fear and phobia. This is a facility with two types of treatment, not just surgical. For those who want to reclaim the power of their own healthcare, designed with the patient in mind.

Concept:

'Natural Rhythm'

The elements that relax our bodies the most, come from nature. The concept looks to immerse a sterile, healthcare environment into a space aligning to our bodies natural rhythm.
