

# **RIDLEY ROAD MARKET**

IDS16204: Rehabilitation & Re-use

By: Kristiana Genca

# SUMMARY:

## LOCATION:

Ridley Road, London, E8 2NP

## BRIEF:

To chose an existing structure at Ridley Road street Market area in London and design a multi-use space for the local community. One of the uses had to be connected to food.

## PROPOSAL:

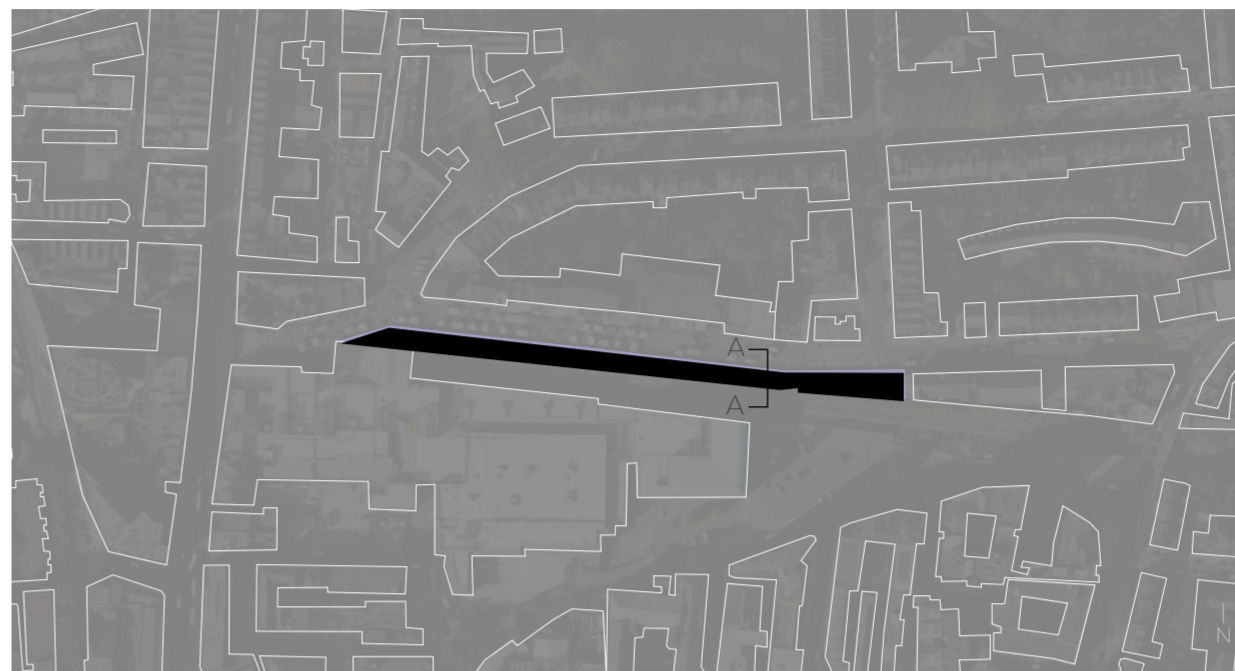

I chose an existing retail store structure that stretches along the side of the Ridley Road market.

After having visited the site and interviewed locals I decide to re-use the existing structure and design:

- 1) retail units on top of the existing structure for traders to have better working environment
- 2) food hall and seating area at the East end of the long structure for marketers and vistors to have a place to sit down and have food.

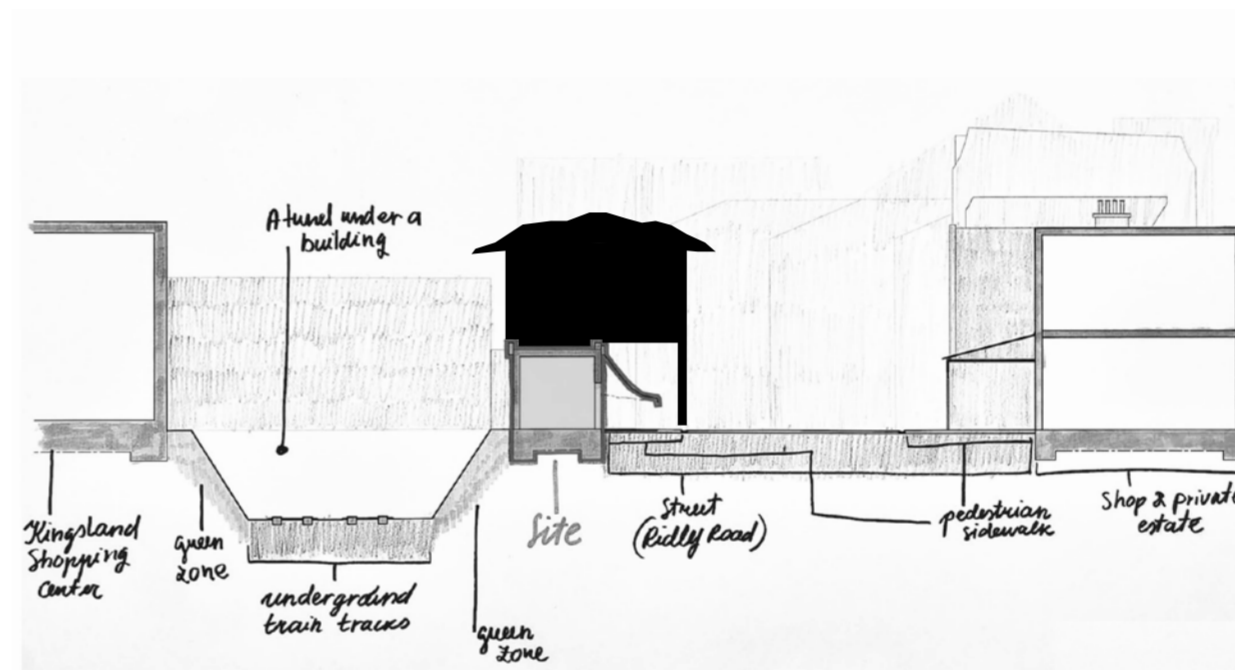

The design was inspired by the shapes and forms of the market stalls and the vivid atmosphere of the market.
