

# "Walnut"

This project is perfect for this category because *it is a Social space that will help the community to grow, allow all deaf/ hard hearing residence and those struggling to communicate (Aphasia disorder), to feel at home.*

The *highlight* of the space is the creation of a sustainable hardwood walnut walkway which *blocks all the disturbing vibrations coming from the main road that can be very painful for those using hearing aids.*

*This is an example f how deaf/ hard hearing people can leave within the Earth's natural limits.*

I am using sustainable natural/ home materials which will give you comfort. "Handling your life issues like at home".
