Highlight and Contrast

Similar to Gordon's inspiration, the chosen concept is **Highlight and Contrast**. The design will mostly focus on the differences in colour, materialities, and atmosphere. It is expected to have a **highlight** that draws visitors' attention and provokes their curiosity to explore other areas once enter the space.

MAKER - COLLECTION

Anna Gordon
annagordon.com

"My inspiration comes from my environment and contrasting opposites. Black and white, hard and soft, natural and man-made, delicate and strong. I use these ideas to create pieces that can be enjoyed by the wearer and viewer alike, the oxidised surfaces appearing as linear sketches on the body."

Anna Gordon's brooches are simple and delicate. Mostly use linear details and combination of different materials. There is contrast within each piece, in terms of shape, form and materiality.
