B

In the UK children who suffer with literacy issues have lower life expectancy.

16.4% of adults have poor literacy skills. Those who do will be at a disadvantage in the job market and are unable to support their children with reading and writing.

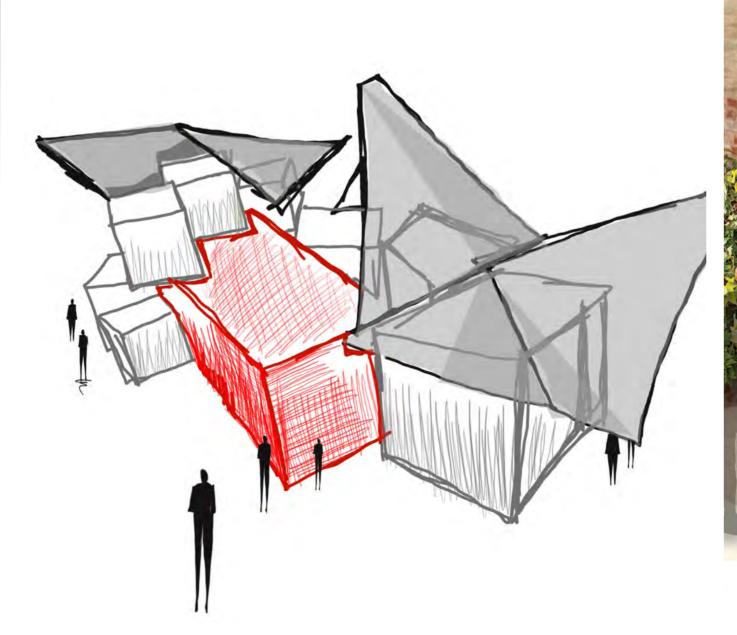

This project is based on the re-design of a local library located in Bedfont Feltham. The library has been under threat of being closed down. Spaces like local libraries are important to communities as these are spaces which bring people together.

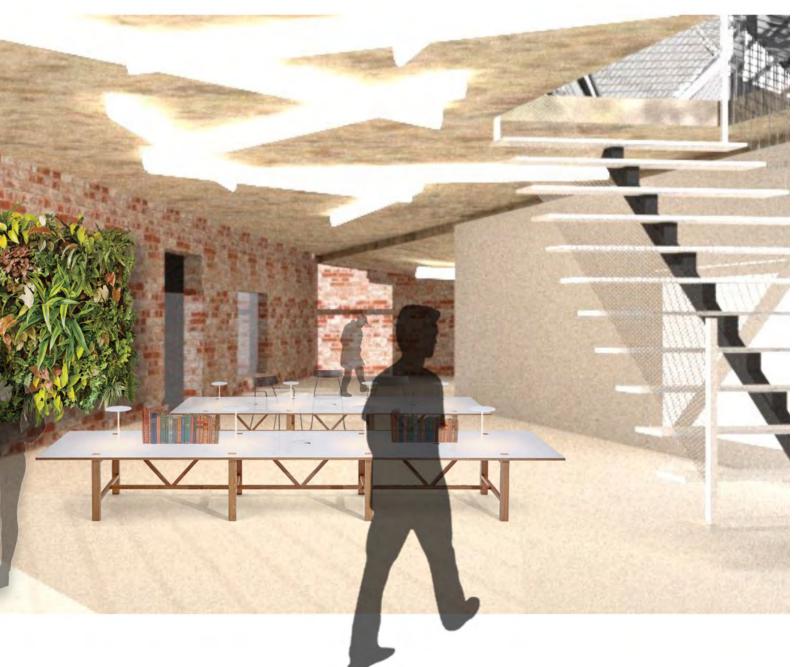

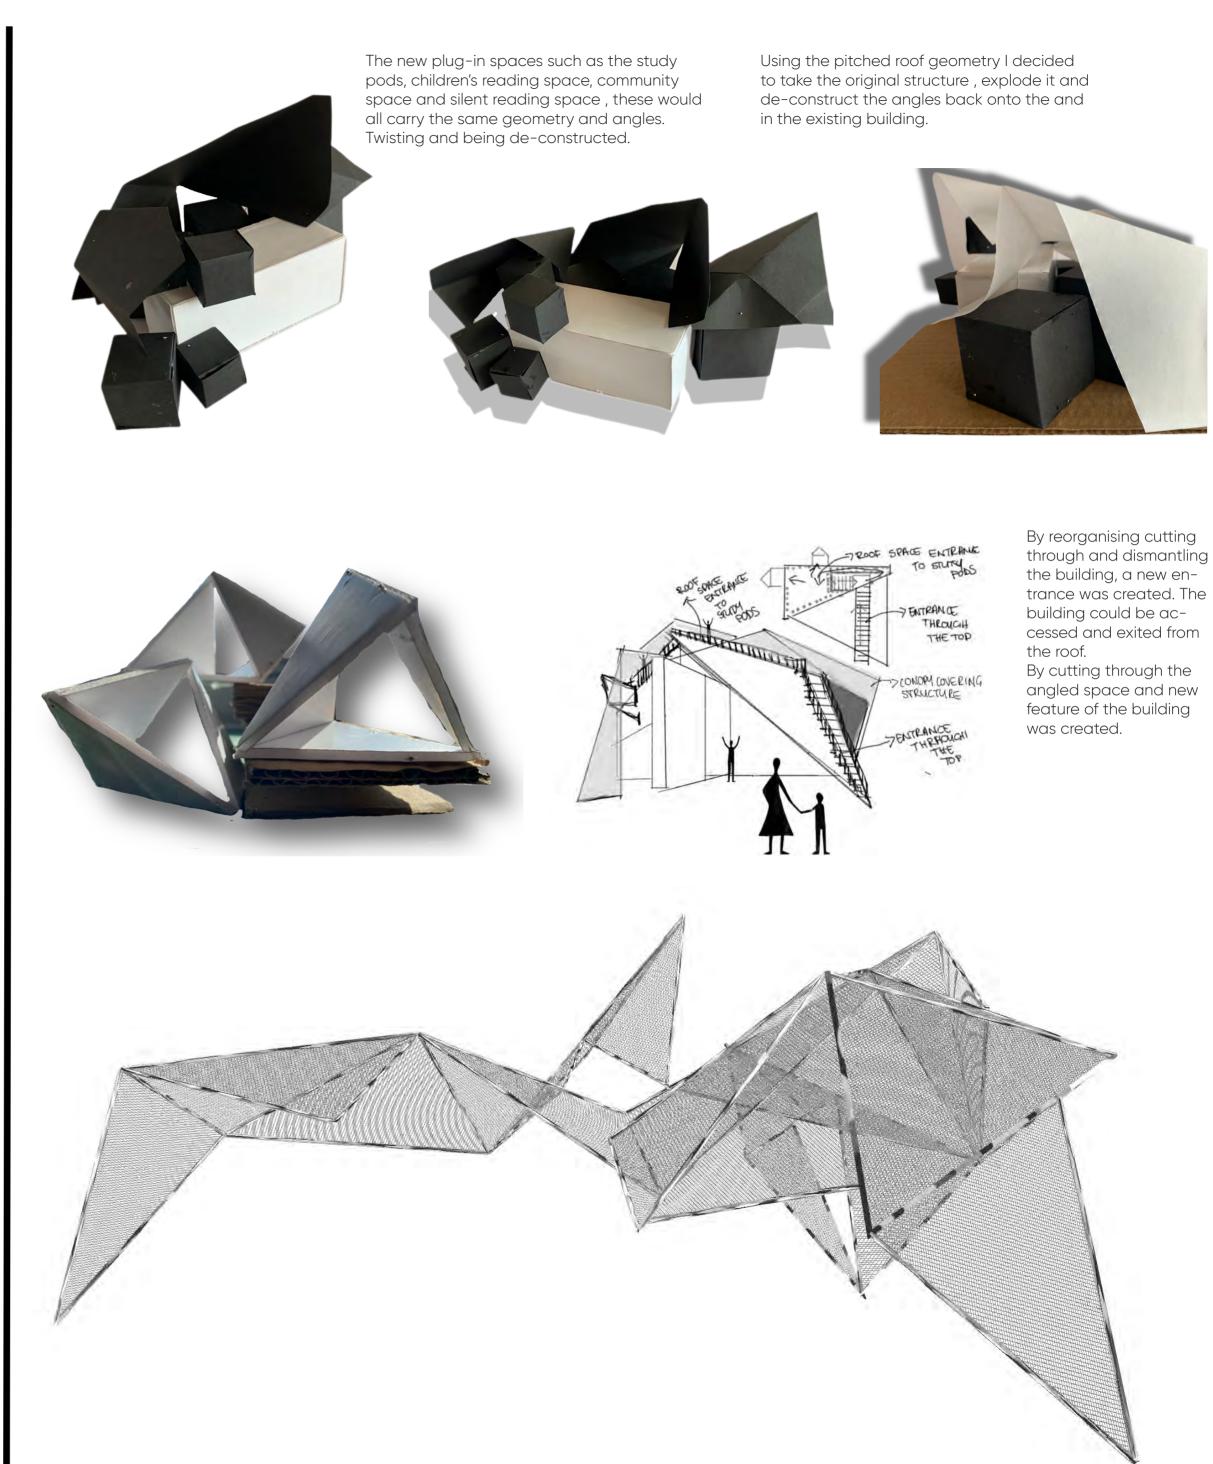

Notably located around the area and on the original building of Bedfont Library are the angular pitched roofs. Mid-evil church across from library around since 1704.

Population estimated around 13,545 Schools- 2 Secondary 6 Primary 1 Special needs
